## [P3D] V4 - Aerosoft A318 A319 - A320 A321 Professional Free Download \/\/TOP\\\\

i did a lot of airports and scenery in p3d, and i don't have much time for this so that i have to sell aerosoft a model (imaginary/virtual) or flight-studio (virtual) dedicated to virtual airlines, even if i have their license to sell in my company, but i think that this concept will work well and that there is plenty of money to earn, even if it is just a dream. the free/pro/premium has to be determined in this new model. it is not a commercial company, but it is possible to make money from the air transportation, i am working on free/premium, so that i release a half-finished version in order to choose my destiny at the beginning of the next year. aerosoft will be the first client, but it will be followed by other companies, so that all of us who wish to earn money by licensing, should be professional aviation and can rival the aviation airline sector. (virtual airlines), my models are free to share them and we only release that the model we have chosen that we share, well be free. we can do the workshops for flight training as well. i guess this is a pipe dream of aerosoft, who will decide if it will be possible or not, so, you can help me to make this dream come true, and if you want to know more about this please contact me at my personal mail box (gino@zeroequanimity.com), thank you for your attention. one of the better known sims, in this case all that is needed is a new flight pack. i would like to report an issue with the a320 earlier, it has a320 and problems with fsu64 and fmx/fdx version. i will post some screenshots below. i think i would like to report it, but there is not much updates to report.
