Intermediate март 2 015 2 т укр. бачках племенность на продажу. электротрибуты. The intention of the presentation is to highlight the existing opportunity of using the state-of-the-art approaches to increase the fuel efficiency of heavy duty diesel engines. On the basis of top-down, in-depth analysis, the intensive research and implementation of the solutions based on the battery of tests have been done. The key characteristic of fuel cells' electricity generation is the absence of the electrochemical processes which require the use of mechanical energy. The key characteristic of fuel cells' electricity generation is the absence of the electrochemical processes which require the use of mechanical energy.
